### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Application serial no. 10/694,084 is being allowed in view of the appropriately filed terminal disclaimer received on December 7, 2004, and since none of the prior art of record teaches or fairly suggests a method for determining either the concentration of a single analyte in a multiplicity of samples or the concentration of a multiplicity of analytes in a single sample by performing a bimolecular reaction between the analyte(s) and a reagent bound to a population of microparticles, wherein each of the microparticles comprises a polymeric microparticle and a plurality of nanoparticles coupled to the polymeric microparticle.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because: It does not state that the person making the oath or declaration believes the named inventor or inventors to be the original and first inventor or inventors of the subject matter which is claimed and for which a patent is sought.

It is noted that the declaration filed on October 28, 2003 in the instant application is a copy from parent application serial no. 09/639,818, which was also objected to since it does not state that the inventors are the "original and first inventors of the subject matter". Applicants can submit a copy of the declaration that was filed on May 15, 2003 in the parent case in order to overcome this objection.
